

## ASTHMA

Paul Lowe

Wooloowin Qld

My 13-year-old daughter Kelly has suffered from asthma all her life. We had to use a vaporizer in her bedroom at night and during the day she used a puffer. When Kelly started high school 2 years ago she went through the bodily changes every young lady goes through, but this started a traumatic time in her life where she would get hot flushes and she would faint. Then she started getting migraine headaches and minor seizures. We took her to a Wickham Tce specialist who tested her for epilepsy. He suggested to us that she go on the 'pill' and/or steroids, maybe the components in these drugs would help her. We point blank refused to use these drugs on our 13 year old girl so we introduced Cellular Nutrition and Tang Kuei to her daily diet. From day one 7 weeks ago has had tremendous results. She has not had to use her puffer once, nor has she had a headache or a seizure plus she lost a needed 2 1/2 kg. She is now a very healthy and happy young lady and her schoolwork has improved as a result.

Thank you Herbalife my daughter did not have to go on the pill or steroids.
